

# MAS9 Source Readiness – Sample Output Report

This is a sample report included in the assessment kit to demonstrate expected outputs.

Overall RAG: **AMBER** (Highest risk category: Automation Scripts)

Category	RAG	Top Findings (count)
Automation Scripts	RED	AS-02 4, AS-05 1, AS-06 2
Workflow	AMBER	WF-02 6, WF-05 3
Java Customisations	AMBER	JV-02 2, JV-04 1

## Recommended Next Actions

- Refactor scripts flagged AS-02 to remove manual transaction control and retest under MAS9.
- Replace direct JDBC usage (AS-05) with MBO / Integration Framework alternatives.
- Review workflows with highest node count and scripted actions; prioritise for SIT regression.
- Address resource-leak findings in custom Java; adopt try-with-resources and retest.
